

## Commercial Handheld Germicidal UV-C

The Solar Sunbeam is a no-contact disinfection device with a non-slip handle that eliminates 99% of harmful bacteria, viruses and other microbes on surfaces and in the air. This system designed to be used to do localized disinfection on surfaces such as patient rooms, labs, kitchens, workstations, keypads, computers, or other similar spaces. The optional safety guards help protect surfaces from accidental scratches and the accompanying face shield should be worn during operation. When used with the Solar Satellite, the user can measure the amount of UV-C that a surface has been exposed to in order to ensure proper disinfection.

## Solar Sunbeam Features

- Dual 21W UV-C bulbs operating at 254nm
- 16,000 hour rated UV-C tube life
- Non-slip handle
- Optional safety guards to prevent scratches
- 33-ft cord with standard 3-pole plug
- Standard G10Q UV-C tube base for easy replacement
- UV-C rated face shield for additional protection
